Information from the website:

“Environmental Training & Consulting International, Inc. was founded in 1993 to design and conduct leading-edge environmental training and consulting with integrity and congruence in arenas not being served by traditional large environmental engineering firms. In the US, we specialize in custom-designed in-house NEPA training for Federal agencies, their customers and contractors.

Our clients range from Federal land and resource managing agencies to regulatory agencies and military branches; from large engineering firms to small resort hotels; from the US to Africa, Latin America and Asia. Check our web site for a long list of ETCI’s industry firsts. All ETCI environmental services are available to agencies of the US Government through GSA Federal Supply Services contract # GS-10F-0163L.

Our Distance Learning Curriculum currently includes 6 modules from the NEPA Toolbox™ Core Curriculum, and is provided free of charge as a service to new practitioners. Complete course descriptions, Distance Learning modules, environmental white papers and entries in The Environmental Blog can be downloaded from our web site.
